

C Sharp - DataGrid to CSV

Klasa:

```
using System;
using System.Text;
using System.IO;
using System.Windows.Forms;

namespace adm
{
    class exportCsv
    {
        protected System.Windows.Forms.DataGridView tabela;

        public exportCsv(System.Windows.Forms.DataGridView tabelap)
        {
            tabela = tabelap;
        }

        public void exportToCSV(string plik)
        {
            string temp = "";
            Encoding e = Encoding.GetEncoding(1250);
            FileStream fs = new FileStream(plik, FileMode.Create);
            StreamWriter fsZapis = new StreamWriter(fs, e);
            for (int x = 0; x < tabela.ColumnCount; x++)
                temp = temp + tabela.Columns[x].HeaderText + ";";
            fsZapis.WriteLine(temp);
            for (int y = 0; y < tabela.RowCount; y++)
            {
                temp = "";
                for (int x = 0; x < tabela.ColumnCount; x++)
                    temp = temp +
tabela.Rows[y].Cells[x].Value.ToString() + ";";
                fsZapis.WriteLine(temp);
            }
            fsZapis.Close();
        }
    }
}
```

Zastosowanie:

```
exportCsv eksportuj = new exportCsv(tabSprzetu);
saveFileDialog1.ShowDialog();
eksportuj.exportToCSV(saveFileDialog1.FileName);
```
