

C Sharp - ListBox - więcej zmiennych w itemie

```
class MyListBoxItemValue
{
    protected string ctext;
    protected int cvalue = 0;
    protected string caddon;
    protected int cvalueaddon = 0;

    public MyListBoxItemValue(string ItemText, int ItemValue)
    {
        ctext = ItemText;
        cvalue = ItemValue;
    }

    public MyListBoxItemValue(string ItemText, int ItemValue, string
ItemTextAddon)
    {
        ctext = ItemText;
        cvalue = ItemValue;
        caddon = ItemTextAddon;
    }

    public MyListBoxItemValue(string ItemText, int ItemValue, int
ItemIntAddon)
    {
        ctext = ItemText;
        cvalue = ItemValue;
        cvalueaddon = ItemIntAddon;
    }

    public int ItemData
    {
        get
        {
            return cvalue;
        }
        set
        {
            cvalue = value;
        }
    }

    public string ItemDataAddon
    {
        get
        {
            return caddon;
        }
        set
```

```
        {  
            caddon = value;  
        }  
    }  
  
    public int ItemDataAddonInt  
    {  
        get  
        {  
            return cvalueaddon;  
        }  
        set  
        {  
            cvalueaddon = value;  
        }  
    }  
  
    public override string ToString()  
    {  
        return ctext;  
    }  
}
```
